

RITVER EXTERIOR PUTTY Product No. PW2507

Ritver Exterior Putty is carefully formulated using an Acrylic copolymer emulsion. It is primarily used for filling surface irregularities, construction flaws, hairline surface cracks & indentations. The surface is rendered smooth and leveled with enough anchorage so as to apply a smooth layer of subsequent coats.

The product can be recommended for both interior and exterior use.

USE

Substates: Concrete, plaster, masonry, gypsum, and wood works.

Area of Use: Interior and Exterior use

SPECIFICATIONS

Properties

Finish	: Smooth & Buttery.
Colour	: White
Specific gravity	: 1.6 ± .02
Solids (% by volume)	: 45 ± 2%
Diluent	: Sweet Water
Flash point	: Not Applicable
VOC Content	: 0 g/ liter
Drying Time (30° C)	: Set to touch: 1 – 2 hours. : Sandable in 2 hours
Note	: Drying is greatly influenced by the thickness, air movement and ambient temperature in the area

SURFACE PREPARATION

A good surface preparation and following the method statement / recommended system procedure of Ritver is an ideal recommendation for the application of **Ritver Stucco Putty**.

For Plaster, Masonry & Concrete:

Achieve a good and clean surface by removing all contaminants by cleaning & drying. A laitance free surface should be achieved by good sweep blast or a wire brush.

Before applying the **Ritver Stucco putty** apply one coat of **Ritver PVA Primer Sealer** and allow drying.

For Wood & Timber:

Achieve a good and clean surface by removing all contaminants by cleaning & drying treatment with **Ritver Wood Preservative compound** is advisable. Start off with a good coat of **Ritver Wood Primer** and allow to dry well.

Exclusions for successful application include perpetually wet surfaces and also large cavities on wooden surfaces.

RITVER EXTERIOR PUTTY Product No. PW2507

APPLICATION METHODS

Adequate ventilation is an ideal situation as it helps in drying and the good application itself. Avoid high humid conditions i.e., >95% when condensation is likely to interfere and also when the surface temperature is at least 3°C above dew point.

.Apply the material using a trowel or spatula making sure that the thickness is uniform. Apply the material at a maximum of 1 mm thickness or lower at one time to avoid cracking. Build the thickness desired using multiple coats but ensuring the previous coat is dry before applying in top of it. Never apply at very high thickness in one application!

TYPICAL PAINT SYSTEM
