

## THICKNESS STUCCO Product No. PW3902

**Thickness stucco** is a top of the line water based finish whose looks brings history to the present day era. It exhibits a finish very much akin to the historical concepts of the paintings and enhances the richness of the exteriors of buildings with a traditional look. It creates a rough but appealing finish and can end up in different patterns utilizing the imagination of an artist and the skills of the applicator. on practically any surface. The product can be over coated with good quality exterior emulsion colours to give a pleasing look. The product is very hygienic and has good anti fungal properties. The maintenance cost is low. The product has virtually long life and can withstands extreme conditions as it can be coated to good thickness.

### USE

**Substrates:** Concrete, plaster, masonry, gypsum.  
**Area of Use:** Interiors with ability to overcoat if needed.

### SPECIFICATIONS

#### Properties

|  |  |
|--|--|
| <b>Finish</b>  | : Rough and plaster like, have the effect of <b>Pitone &amp; Coccodrillo</b> |
| <b>Colour*</b>   | : Natural colours of earth resembling the traditional soil.                  |
| <b>Specific gravity</b>  | : 1.8 ± 0.02   |
| <b>Solids (% by volume)</b>  | : 58 ± 2   |
| <b>Diluent</b>   | : Sweet Water  |
| <b>Flash point</b>   | : Not Applicable   |
| <b>Spread Rate:</b>  |  |
| While the spread rate is directly dependant on the surface profile, the pattern required and also the type of undulations it has, as a thumb rule <b>Thickness stucco</b> would cover app 1.0 to 1.5 sq mtr per Kg, and may be taken for cost calculations. (The coverage is not very significant as it can be applied to varying thickness. |  |
| <b>Drying Time (30° C)</b>   | : Set to touch: 2 – 3 hours.<br>: Ready for Recoat: at touch dry stage.      |
| <b>Recommended DFT</b>   | : <b>Thickness can be achieved as per requirement.</b>                       |

### SURFACE PREPARATION

A good surface preparation and following the method statement / recommended system procedure of is an ideal recommendation for the application **Thickness stucco**

Exclusions for successful application include perpetually wet surfaces and also large cavities on wood, metal & concrete surfaces.

Ensure the surface is clean, dry & free from all loose or flaking particles. Apply **all weather Tex Primer** or **AR Primer** for the concerned substrate. Allow it to dry and keep the same ready for the forthcoming coats of **Thickness stucco**.

This information contained in the data sheet is to the best of our knowledge correct and up to date. Under well-defined conditions. Its accuracy or suitability under the actual conditions of any independent use is not guaranteed and must be determined by the user. All advice given about this product is given in good faith. Since as we have no control over conditions of substrate and application, manufacturer and seller cannot accept any liability in connection with the use of the product relative to coverage, performance, injury, or damage, unless we specify in writing to do so. The information in this data sheet is subject to change without prior notice and it is the user responsibility to ensure it is current. ### APPLICATION METHODS

Adequate ventilation is an ideal situation as it helps in drying and the good application itself. Avoid high humid conditions i.e., >95% when condensation is likely to interfere and also when the surface temperature is at least 3°C above dew point.

One can add minimum quantity of sweet water for getting the right consistency depending on the speed and skill of the applicator. One should apply with a putty knife or a broad bladed knife and spread it evenly to the desired pattern. Allow to dry and then repeat the applications to the desired thickness. It is advisable to build up the quote with nominal thickness per application. This would ensure proper cure and capability of drying without cracks.

If coloring is required use a natural colour of **Thickness stucco** and apply a good layer of good quality external emulsion as per the desired colour.

### TYPICAL PAINT SYSTEM
